## Zaščitna Krema

Zaščitna in regenerativna lokalna inovacija z učinkom zaščitne pregrade za kožo in sluznice

Z

**OZOILE®**  
**BREUETTO ERBAGIL**  
Ozonidi stabilni

**Ozoile®**, Stabilni ozonidi, edinstvena sestavina linije Bensel Pet, so skupek molekul, pridobljeni s patentiranim procesom zelene tehnologije, ki poteka z reakcijo določene mešanice kisika in ozona z olefinskimi vezmi maščobnih kislin organskega ekstrakta deviškega oljčnega olja +OIL®s posestva Erbagil.

### SESTAVINE

Voda, Ozonizirano oljčno olje, Cetil Peg/Ppg-10/1 Dimetikon, Čebelji vosek, Tokoferilacetat, Glicirretinska kislina, Izvleček listov črnega ribez, Natrijev hijaluronat, Olje listov čajevca, Tetrasodijev glutamat diacetat, Fenoksietanol/etilheksilglicerol.

### OZOILE®

Pomaga pri negi kože v primeru draženja in srbenja. Podpira ravnovesje mikrobiote. Prispeva k pomirjavi kože ter zmanjšanju rdečice, srbenja, občutka toplote, otekanja in luščenja. S svojim antioksidativnim delovanjem pomaga zaščititi kožo in prispeva k njeni obnovi. Pomaga pri procesu reepitelizacije in regeneracije kože.

### ČEBELJI VOSEK (CERA ALBA)

Sredstvo za tvorbo filma, ki na koži in sluznicah ustvari zračno prepustno zaščitno plast, ki jih neguje in podpira njihovo regeneracijo.

### VITAMIN E ACETAT

Pomirjujoč učinek, pomaga zaščititi celične membrane pred peroksidacijo lipidov. Deluje kot antioksidant, nevtralizira proste radikale.

### HIALURONSKA KISLINA

Zaradi svojih viskoelastičnih lastnosti prispeva k fizični zaščiti tretiranega območja. Spodbuja vlaženje in ponovno epitelizacijo kože, izboljšuje tonus in čvrstost.

### ČRNI RIBEZ (RIBES NIGRUM)

Deluje pomirjujoče, zmanjšuje rdečico kože.

### GLICIRETINSKA KISLINA

Pomirja razdraženost, pekoč občutek in srbenje kože.

### ČAJEVEC (MELALEUCA ALTERNIFOLIA)

Krepi delovanje sestavine Ozoile®.

### INDIKACIJE

Za lokalno uporabo na koži in sluznicah živali. Izdelek tvori naravno, zračno in zaščitno pregrado, ki spodbuja vlaženje ter prispeva k ohranjanju ravnovesja hidrolipidnega plašča. Ta zaščitna plast pomaga varovati kožo in sluznice ter podpira njihove naravne obnovitvene procese in vzdrževanje fiziološkega stanja. Ustvarja neugodno okolje za prekomerno razrast mikroorganizmov s površine kože.

### UPORABA

Nanesite ustrezno količino zaščitne kreme Cicatrioil® neposredno na kožo ali sluznico živali. Po potrebi nežno odmaknite dlako. Uporabo ponovite dva- ali večkrat dnevno oziroma po navodilih veterinarja. Za boljše učinkovitost pred nanosom priporočamo čiščenje območja s šamponom Rigiderm® in izpiranje s pomočjo bombažnih blazinic. Za lažji nanos na predel zunanega spolovila, zadnjika, sluznic ter drugih težje dostopnih mest je Cicatrioil® zaščitna krema opremljena s priloženo kanilo, ki jo po potrebi privijete na tubo. Po vsakem nanosu s kanilo jo temeljito očistite z blagim detergentom in sperite s toplo vodo. Kanilo shranite za naslednjo uporabo.

Po vsaki uporabi tubo skrbno zaprite.

Trajanje uporabe je odvisno od posameznega primera in odziva kože živali.

### OPOZORILA

Izdelek je namenjen izključno za zunanjo uporabo. Ne zaužijete. Hranite izdelek izven dosega otrok. Ne uporabljajte, če je embalaža poškodovana. V primeru stika z očmi izperite temeljito z vodo. Shranjujte na hladnem, suhem mestu, stran od toplote in neposredne sončne svetlobe. Priporočena temperatura shranjevanja je med 5 °C in 35 °C. Pred uporabo si temeljito umijte roke. Po uporabi tubo skrbno zaprite. Po odprtju izdelka ga priporočamo uporabiti v roku 6 mesecev. Zaščitna krema Cicatrioil® je dobro prenašana. Do danes niso znani primeri preobčutljivosti ali neželenih učinkov. Ne uporabljajte izdelka v primeru potrjene preobčutljivosti na izdelek ali katerokoli njegovo sestavino. V primeru pojava neželenih reakcij prenehajte z uporabo in se posvetujte z veterinarjem.

# Cicatrioil®

## Barrier Cream

PROTECTIVE AND REGENERATIVE TOPICAL  
INNOVATION WITH BARRIER EFFECT  
FOR SKIN AND MUCOUS MEMBRANES

with

**OZOILE®**  
**ERBAGIL PATENT**  
Stable Ozonides

**Ozoile®**, Stable Ozonides, an exclusive component of the Bensel Pet line, is a pool of molecules obtained through a patented green technology process by reaction of a defined oxygen-ozone mixture with the olefin bonds of the fatty acids of the organic extra virgin olive oil +OIL® from Erbagil Estate.

### INGREDIENTS

Aqua, Ozonized Olive Oil, Cetyl Peg/Ppg-10/1 Dimethicone, Cera Alba, Tocopheryl Acetate, Glycyrrhetic Acid, Ribes Nigrum Leaf Extract, Sodium Hyaluronate, Melaleuca Alternifolia Leaf Oil, Tetrasodium Glutamate Diacetate, Phenoxyethanol/Ethylhexylglycerin.

### OZOILE®

It acts on the irritative and itchy state and creates a hostile environment for changes in the microbiota. It counteracts redness, itching, burning, swelling, desquamation and degenerative processes in progress due to its antioxidant action. It brings oxygen to the site, promotes re-epithelialisation and tissue normalisation.

### CERA ALBA

Film-forming agent, creates a breathable protective barrier that nourishes skin and mucous membranes and promotes their regeneration.

### VITAMIN E ACETATE

Soothing effect, counteracts membrane lipid peroxidation. Blocks free radicals.

### IALURONIC ACID

Contributes to the physical protection of the treated area due to its visco-elastic properties. Promotes moisturisation and re-epithelialisation, provides tone and turgidity.

### RIBES NERO

De-reddening action

### GLYCYRRHETINIC ACID

Acts on irritation, burning, itching.

### MELALEUCA ALTERNIFOLIA

It enhances the action of Ozoile®.

### INDICATIONS

Topical use on animal skin and mucous membranes. The creation of a natural breathable and protective barrier that promotes hydration and restoration of the hydro-acid-lipid mantle, which protects and promotes

the physiological regeneration, re-epithelialisation and normalisation of skin and mucous membranes and creates an environment that is hostile to abnormal microbial proliferation, makes Cicatrioil® barrier cream with Ozoile and Cera Alba effective in assisting the repair of damaged skin. Cicatrioil® barrier cream is indicated in cases of macerated erythema localised in the various body districts, eczematiform lesions, impetigo and more generally in all problems of damaged skin and mucous membranes also characterised by superimposed bacterial and/or fungal colonisation. The protective shielding effect also makes the formulation particularly indicated in the prevention and treatment of problems in the breast, genital and ano-rectal area.

### WAY OF USE

Apply an appropriate amount of Cicatrioil® barrier cream directly to skin or mucous membranes, moving the coat if necessary. Repeat two or more times a day or as directed by your veterinarian. For greater efficacy before application, cleanse the area with Rigederm® shampoo and rinse with the aid of cotton pads. In order to facilitate treatment of the genital and anal area, mucous membranes and more generally hard-to-reach areas, Cicatrioil® barrier cream is equipped with a cannula that can be screwed onto the tube if necessary. After each application with the cannula, wash the cannula with detergent and rinse with warm water. Keep the cannula for subsequent applications. Close the tube carefully after each application. The treatment period is variable depending on the problem to be treated and the subjectivity of the therapeutic response.

### WARNINGS

Product intended for external use. Do not ingest. Keep product out of the reach of children. Do not use if packaging is damaged. In case of contact with eyes rinse thoroughly with water. Store in a cool, dry place away from heat and direct sunlight. Store preferably between 5 °C and 35 °C. Wash hands thoroughly before use. Close the tube carefully after use. After opening, it is recommended to use the product within 6 months. Cicatrioil® barrier cream is well tolerated. No cases of sensitisation and side effects are known to date. Do not use in the event of proven hypersensitivity to the product or any of its components; should such phenomena occur, it is advisable to discontinue treatment and consult your veterinarian.
